BUILT TO LAST. BUILT FOR DESIGN

Why choose WPC Material?

BUILT TO LAST. BUILT FOR DESIGN

Wood Plastic Composite (WPC) is an innovative, eco-friendly material made from a blend of wood fibres and PVC resins — engineered for strength, durability, and sustainability in modern construction. Discover the key advantages that make WPC the preferred choice for residential and commercial building applications.

Waterproof:

Ideal for washrooms, kitchens, weather changes.

Termite-Resistant:

No costly chemical treatments required.

Fire-Retardant:

Safer for residential and commercial projects.

Eco-Friendly:

Made with recycled wood powder, formaldehyde free.

Strong & Durable:

High tensile strength, superior screw-holding, warp-free, long lifespan.

WPC Doors Range

Premium WPC Doors (8 mm wall thickness)

Modern, durable doors for bedrooms, and commercial interiors. Fully waterproof, termite-resistant and eco-friendly; available in multiple textures/finishes to elevate any space.

Specifications:

Length 84" or 96" · Width 27", 30", 33", 36", 39" · Door panel 38 mm · Wall 8 mm.

Economical WPC Doors (5 mm wall thickness)

Value-driven performance for homes and commercial use without compromising core protection. Two options: Economical WPC Assembly Door and 5 mm Wall WPC Door. Water-resistant, termite-proof, and low-maintenance.

Specifications:

Length 84"–96" · Width 27", 30", 33", 36", 39", 42" · Door panel 40 mm · Wall 5 mm.
